

PROTECT YOUR FLEET

You chose Allison Automatics to get the most performance, reliability and productivity from your fleet. So, when it comes to their care and maintenance, let our factory-trained Allison service technicians protect them using Genuine Allison Parts. TranSynd™ TES-295 transmission fluid and Genuine Allison High Capacity Filters provide the best protection and greatly extend fluid and filter change intervals in most applications. That means less routine preventive maintenance, less downtime and greater savings for you.

ALLISON FIRST. ALLISON ALWAYS.
